

Medical Roll-CIT™ and Focus-CIT™

For the first time ever, therapists are able to offer their clients Professional Needling. This revolutionary new treatment harnesses the body's natural powers of healing to repair damaged skin and achieves incredible results never before seen in-salon. Needling is especially effective for photo damage, acne scarring, slacked skin, stretch marks, uneven skin tone and dilated blood vessels.

Increased collagen and elastin, naturally

During this painless treatment, the Medical Roll-CIT™ is used to create thousands of microscopic channels in the epidermis. This creates a minimal amount of bleeding that releases a cascade of growth factors, which is a natural healing response to inflammation and results in increased collagen and elastin production.

To prepare their skin for the high levels of nutrients it will absorb, clients should have been using their Environ' vitamin A creams for at least three weeks prior to treatment. They will experience redness or puffiness immediately after needling and their skin may be dry for a few days but this is completely normal.

Improvements are often visible after one treatment, but six spread over 6 - 24 weeks is recommended for optimum results.

Professional Needling: Incredible results without surgery

- Not painful - a topical anaesthetic is used
- Short healing phase (usually three days)
- Does not damage the skin, unlike some alternative treatments which permanently thin the epidermis
- Completely natural, uses the skin's own powers of rejuvenation
- Can be done on all areas of the face and body
- Does not cause sun sensitivity
- Lasting effects - collagen continues to be laid down in the months following treatment

What the press say...

A highly targeted, ongoing PR campaign means that Environ® enjoys extensive press coverage. This raises the profile of the brand, which helps to boost sales for our stockists.

The state of the art products and hi-tech delivery left us with a radiant and nourished complexion. Try this and you'll be joining the ranks of beauty insiders who swear by the brand.

Top Sante, commenting on the Environ® lonzyme® Active Vitamin Facial

A friend tells me she's never seen my skin looking better and asks if I'm wearing a foundation. No, as it happens. A persistent dry patch on the bridge of my nose feels smooth for the first time in years.....the general verdict is that I glow.

Sarah Bailey, Harpers Bazaar

I absolutely swear by lonzyme® C-Quence Eye Gel. It's very light, yet delivers a mega dose of peptides and young-skin essentials vitamins A, C and E.

Alessandra Steinherr, Glamour

The first step has been finding a skincare range that I love. Power facia list Anastasia Achilleos introduced me to Environ® and I haven't looked back.

Annabel Meggeson, Elle

I used Environ® Hydrating Oil Capsules after a holiday when my skin was feeling parched. It was easily absorbed...and I felt my skin benefited from the concentrated dose of moisture.

Jane Dale, quoted in The index

I love the Environ® Range - I've used their products for a long time.

Leslie Kenton, writer, broadcaster and film-maker, quoted in Natural Health

(Professional Needling) is the only dramatically anti-ageing natural facial treatment I've come across to dateI have never seen my skin look so glowing and dewy before. My cheeks and forehead are visibly smoother after three sessions and I'll be going back for more.

Suzanne Aaronson, Huffington Post

Many celebrities are raving about the AVST range and it really does seem to work.
